

# Care Instructions for Laminate Tables

## Care & Use:

Avoid setting hot items directly on the laminate tables as extreme heat can damage the surface. If you must place a hot item on the laminate surface, first place a protective cloth such as a pot holder on the table surface to protect the laminate. To prevent scratches, do not drag items across the table as that can lead to scratches and marks that may damage the surface and be irreparable.

## Cleaning Instructions:

Wash the table with a mild cleaning solution using a moist cloth, lukewarm water and a mild soap.

**Warning: Do not scrub the table to remove the dirt, instead, gently rub the surface of the laminate table.** After cleaning the laminate table, dry the surface, as water can seep inside the furniture and cause damage.

## Polishing:

Follow the instructions properly on the furniture polish to remove stubborn stains.
